The 160 R is a great choice for boaters needing a compact all-rounder with a small price tag. This starboard console boat is extremely spacious considering its compact size, and suits well for use both at the summer house, for fishing and for shorter leisure trips and commutes. The sturdy construction and high freeboard make AMT 160 R safe to operate even in choppy seas and moderate waves. The interior layout is well designed to function optimally in varied use and the meticulous use of space leaves plenty of room for both passengers, equipment and personal belongings.

The deck is equipped with a grey anti-slip surface, which makes it safe to move around in the boat. The grey surface is also easy to keep clean. Stainless steel grab rails strategically placed in the boat increase the feeling of safety both while embarking/debarking and while operating the boat. The standard price includes the necessary boating equipment, complete with mooring lines, anchor and anchor line, fenders with tieoff lines, boat hook/paddle and fire extinguisher. We also include a detached reserve fuel tank and Securmark anti-theft marking. See the accessory list below for additional equipment possible for this model.

All the AMT boats are designed and manufactured in Finland.

**STANDARD EQUIPMENT**

- ✗ Seat cushions
- ✗ Integrated Abloy locks
- ✗ Harbour cover
- ✗ Storage cover
- ✗ Console cover
- ✗ Fixed fuel tank
- ✗ Waterski tow bar
- ✗ Fender socks

AMT 190 R is a true multipurpose boat equipped with a well-sheltering 2-seated center console. The large console protects from wind and sea sprays, while simultaneously allowing excellent visibility in all directions both when driving sitting down or from a standing position. The smoothly running hull gives the boat great performance, prompt manoeuvrability and low fuel consumption.

190 R is perfect not only for fishing trips, but also for various forms of sea transfers as well as pure leisure. The bow can be fitted with a sundeck, which serves both sun worshipers and recreational fishermen, who can utilize the sundeck as a casting platform. The walk-around layout makes it effortless to move around the boat while fishing, as well as safe to operate the boat when docking. Embarking the boat has been made easy from all entering points; the handy steps in the bow, together with sturdy grab rails, makes the bow a natural point of entry for many, but just as easily the 190 R is entered via the stern corners. If docking sideways, the anti-slip surface strips on top of the gunwale helps you maintain grip and thus safely board the boat. The 190 R is not only a practical and ergonomically designed entity, it is also extremely stylish and easy on the eye. The 190 R is now also available with an aluminum hull, please see page 7 for details.

All the AMT boats are designed and manufactured in Finland.

AMT's F-range represents the new generation of AMT boats, where the hulls are made out of strong and durable marine aluminum. The 175 BRf is the smallest of the F-models, and is identical with 175 BR fiberglass sister model when it comes to interior. Designing the 175 BR models main focus has been on safety, effortless usage and a stylish design.

The 175 BRf runs quietly in water and offers smooth rides through waves - of course without sacrificing the great drivability, performance and fuel efficiency. Interior-wise the AMT 175 BRf represents the best use of space and it is one of the most spacious models in its size range. Clear walkways, comfortable areas for passengers, spacious storage units and distinct places for all boating equipment are just some of the model's key features. The whole boat has been designed to ensure you a safe and effortless boating experience both while on open waters and when docking.

We take pride in having a comprehensive set of standard equipment, which includes e.g. solid Abloy locks for the storage compartments, the one-piece door in-between the two ergonomically designed steering consoles, the stern seat cushions, a 60 litre fuel tank and a detachable spare fuel tank.

**STANDARD EQUIPMENT**

- ✗ LED deck lights
- ✗ Fender socks

With a durable aluminum hull, this centre console equipped AMT is the choice especially for boaters enjoying recreational fishing, but want to steer clear of single-use boats. The AMT 190 Rf is a versatile multipurpose boat that manages both fishing trips, access boating and day cruising without sacrificing safety, driving capabilities or performance. The smoothly running aluminum hull gives you the opportunity to beach in rocky natural harbours and navigate through shallow waters without worrying about bumps and dents, leading to a more effortless boating experience.

The large two-seated centre console protects from wind and sea sprays, and allows excellent visibility in all directions. Driving is comfortable from both seated or stand-up position. The walk-around layout makes it easy and safe to move around the boat when docking as well as during fishing. Well-placed grab rails further improves safety onboard when on the go or when embarking/debarking.

All the AMT boats are designed and manufactured in Finland.

NEW!

190 BRf, which was introduced in 2019, is a true leisure boat for boaters who value effortless and comfortable boating, without having to compromise on performance, safety and driving characteristics. It is a spacious and versatile bow rider that gives fast yet stable rides. The sturdy and durable hand-welded aluminum hull allows you to land on rocky beaches and navigate through shallow waters without having to worry about bumps and dents. All materials and components used are of high quality and standard, following the AMT vision.

The 190 BRf is extremely fun to drive, combining drivability with performance and speed. It offers also great comfort for both driver, co-driver and passengers, as we have included plenty of accessories as standard. By choosing additional accessories from the add-on list, you can tailor the boat to fit your own specific needs.

All the AMT boats are designed and manufactured in Finland.

The all-new AMT 165 BR is a stylish and easily manoeuvrable bow rider suited for various needs. Thanks to the new genial hull design and the well-functioning layout the boat is surprisingly spacious for its size, making the 165 BR great for commuting, leisure cruising or even fishing. Its outstanding agility, precise drivability and the compact size make the 165 BR a true contender also for novice boaters, who value safety, stability and Finnish quality. The sharp bow cuts beautifully through waves, making the boating experience immensely enjoyable.

Thanks to the high windshield and the sturdy one-piece door between the consoles, sea journeys are not only comfortable but also dry from sea sprays. Up to three adults travel comfortably on the stern bench, and underneath the bench there is plenty of storage space. Unlike many other boats in this size category the 165 BR has a fixed fuel tank, which means that there are no separate fuel tanks taking up storage space inside the stern bench. The pilot and co-pilot sit on fully padded comfort seats.

All the AMT boats are designed and manufactured in Finland.

AMT 175 BR represents the best use of space on the market and is one of the most spacious boats in its size category. The main focus on the design process has been boat's safety, stylish design and making sure boating is as effortless as it is fun.

The sleek hull runs quietly in-water and behaves consistently in all conditions, providing the boater with comfortable rides through waves. But don't confuse comfort with dull rides - this stylish bow rider offers great performance making boating extremely fun. Drivability and fuel efficiency are some of the boat's top attributes.

All the AMT boats are designed and manufactured in Finland.

AMT 190 BR is an action-packed access and leisure boat equipped with a sporty hull, especially designed for effortless boating. The boat is extremely fun to drive and performs superbly, but safely and comfortably. The 190 BR is equally suited for city cruising and fishing as for water sports and use at the summer house. This stylish bow rider's main selling points are its unprecedented spaciousness and extensive level of standard equipment.

Thanks to the well-designed hull, 190 BR runs smoothly through the waves and behaves consistently in all conditions. The sharp bow directs sea spray to the sides, ensuring all passengers are kept dry even in speeds well beyond marching pace. The genial hull design also makes sure that fuel consumption stays reasonable, and together with a large fuel tank this equals to a long range of usage.

All the AMT boats are designed and manufactured in Finland.

Sleek, stylish and sporty are three adjectives of many that describe this sassy newcomer of the AMT range. AMT 210 BR is the choice for boaters who demand not only performance and drivability, but also great looks, high quality and meticulous attention to detail.

The 210 BR replaces the 200-series bow rider, which has been an AMT favourite for many years. Design-wise 210 BR follows the sleek looks of the 175 and 190 models, showcasing more modern and straight lines than its predecessor. The new design ensures more effective use of space and an interior layout that feels significantly larger. Thanks to the new genial hull design, the 210 BR offers outstanding driving properties, good fuel efficiency and high performance according to AMT's standards. We also take pride in the extensive storage capacity, the comprehensive set of standard equipment and comfortable seating arrangements.

All the AMT boats are designed and manufactured in Finland.

AMT 230 BR is the largest bow rider in the AMT range. This means lots of space for driver, co-driver and passengers, as well as more storage capacity and of course a higher engine tolerance which equals in more speed. The 230 BR is designed especially for consumers who desire an action-packed boat for quick and effortless boating. The 230 BR's performance is outstanding and the great fuel efficiency together with a large fuel tank translates into a long range of usage.

The spacious bow with solid steps down to the deck does not only make embarking/debarking and loading/unloading safe and effortless, but also offers temporary seating, and a wide open deck that e.g. recreational fishermen cherish. All the details from the canopy and fenders to the lids of the storage compartments have been designed for easy use.

All the AMT boats are designed and manufactured in Finland.

\*\*\*) An installation module is required for the Waeco CR-50 fridge and the Wallas 800D -cookers. The module is placed on the stern bench behind the co-pilot's seat.

This stunning new AMT day cruiser offers excellent driving properties and high performance for more demanding user. It is easy to manoeuvre and fun to drive, at the same time as it is sturdy and safe to operate. The cozy front cabin and open aft make the 210 DC an excellent choice for people, who enjoy pleasant travelling with the possibility to spend the night onboard.

The AMT 210 DC replaces the 200 series day cruiser, and offers significantly more space and even better comfort than its predecessor. The novelty's design differs quite a bit from the earlier AMT day cruisers, as the lines are more straight and modern. This translates into more space and a more effective interior layout. The 210 DC is sleek and sporty, just like the 175 and 190 models, and the meticulous attention to details makes 210 a real new age day cruiser.

All the AMT boats are designed and manufactured in Finland.

As the most sizeable day cruiser in the AMT range, the 230 DC is the perfect leisure boat for a bigger crowd or a larger family. The comfortable U-shaped couch in the spacious stern unfolds easily into an ample sunbed or spare bed and underneath the couch is plenty of storage space. In the space under bow deck sleeps two adults. The 230 DC comes with an extensive set of standard accessories, but it is also easy to tailor to ones own needs with the help of the lengthy additional accessory list.

Although the 230 DC is almost 7 meters long, it is still easy to manoeuvre and has excellent driving properties, and surprisingly enough it is also very fuel efficient for its size. The 230 DC also offers robust performance, sporty speed and agility, making it extremely fun to drive.

All the AMT boats are designed and manufactured in Finland.

\*\*\*) An installation module is required for the Waeco CR-50 fridge and the Wallas 800D -cookers. The module is placed on the stern bench behind the co-pilot's seat.

A beast of a boat. AMT 230 DCs is a special edition version of the AMT flagship model, the 230 DC. It is pre-rigged for Suzuki and designed especially for the innovative Suzuki DF350 A outboard engine. The high performing and super effective 350 hp engine offers a thrilling boating experience but at the same time driving at marching speed is surprisingly fuel efficient. The 230 DCs is extremely fun to drive and it will certainly attract admiring gazes when you enter the harbour - and with a maximum estimated speed of approx. 55 knots you can quickly leave the daydreamers behind!

Aside from the Suzuki pre-rig, the standard accessories are the same for both the 230 DC and the 230 DCs. Interior-wise the 230 DCs is identical to the flagship 230 DC model.

All the AMT boats are designed and manufactured in Finland.

**STANDARD EQUIPMENT**

- ✓ 2 berths
- ✓ Grey teak laminate set
- ✓ Self bailing deck
- ✓ Unsinkable Always to shore -structure
- ✓ Comfort seats with seat covers
- ✓ Seat cushions (Dryfeel)

**AMT 215 PH**  
PRO FISHING

The AMT pilot house is designed for demanding boaters and fishermen who not only want, but need to be out on the sea from the second ice breaks in the spring until the ice sets in late fall. It is a versatile, extremely seaworthy and high performing seafarer that is characterised by its high bow, its spacious and flat aft deck, its ample storage and the sheltered cabin for sleeping. The PH is suited for a number of uses, from commuting to freight transport, to fishing, coastal excursions and professional use. The boat can be tailored to specific purposes, which has been taken into consideration already at the design phase.

The AMT 215 PH is a combination of top-class finish and powerful features, designed to handle even the roughest of conditions. No need to even consider turning back to the shore if the wind suddenly picks up, the 215 PH takes you safely whenever and wherever you need to go no matter the prevailing weather conditions.

All the AMT boats are designed and manufactured in Finland.
