This easy-to-use, multipurpose boat with high sides and a deep V hull runs smooth and safe in all conditions and is ideal as a summer cottage boat, for fishing or for cruising.

An entry model, that brings the high AMT quality to the 4.5-meter class. Thanks to its safety, the model suits well for both families and younger boaters. The steady, easy-to-clean and self-draining construction makes the boat easy to maintain. Due to its light weight it runs well and economically with a 40 hp engine.

All the AMT boats are designed and manufactured in Finland.

AMT 165 BR is a compact package for even more demanding boaters. This nimble but stable boat can be equipped with 50 to 60 hp engine.

The new AMT 165 BR is a smaller version of the popular 175 BR. The AMT 165 BR can be rigged with a 50-60 hp engine and runs smooth and safely in all conditions. The driver sits in a separate seat making the seating area spacious and allowing 5 persons to sit comfortably behind the windshield. The single door between the consoles is easy to use and gives a good protection against wind and water. The boat comes standard with comfort seats, cushions, integrated Abloy-locks and fixed fuel tank. A canopy and an up to 9" chart plotter can be added if needed. All the AMT boats are designed and manufactured in Finland.

AMT 175 BR is a spacious, stylish and versatile all-rounder, especially well suited for speed-enthusiastic and quality-conscious boaters. In designing the AMT 175 BR, the main focus has been on safety, effortless usage and a stylish design.

The hull runs quietly in-water and behaves consistently in all situations, offering smooth rides through the waves - of course without sacrificing the great driving capabilities, performance and fuel efficiency. The interior layout is one of the most spacious models in its category. The model houses clear walkways, comfortable passenger areas, spacious storage units and distinct places for all boating equipment. Between the two ergonomically designed steering consoles a one-piece door has been installed, which increases wind protection for the passengers traveling in the back. The stern area also has separate holders for four fenders. Solid Abloy locks for the storage compartments, the stern seating cushions, a 60 liter fuel tank are included in the standard pack price. Behind the stern bench a spacious compartment for the canopy has been fitted and it is also possible to install a separate table on the stern deck. On the additional accessory list you can find add-ons to make your sea journeys even more comfortable.

All the AMT boats are designed and manufactured in Finland.

The AMT 190 R is a great companion both for day cruising, access boating or fishing. The stylish design makes AMT 190 R an eye-catcher in the harbor.

The AMT 190 R center console is easy and fun to drive even in rougher waters. The smoothly running hull gives the boat excellent performance and low fuel consumption. The large console protects from wind and water, allowing excellent visibility in all directions, and driving is easy and safe in a standing position as well. The walk around layout makes it very easy and safe to move around onboard, on water, when docking or when fishing.

All the AMT boats are designed and manufactured in Finland.

The AMT 190 BR is an action-packed access and leisure boat equipped with a sporty hull, especially designed for effortless boating. AMT 190 BR is extremely fun to drive, and it's suited equally as well for city cruising and fishing as water sports and use at the summer house.

Thanks to the new hull design, it runs smoothly through the waves and also ensures that fuel consumption stays reasonable. Together with a large fuel tank this equals in a long range of usage. The engine recommendation is 80-115 hp, and already with a 100 hp outboard engine the top speed closes in on 40 knots.

The boat's open deck areas are vaster than in other bowriders in the same size class. It's equipped with extensive standard accessories and encompasses plenty of storage. The storage compartments have been fitted with Abloy's single-key system, which means that you can leave your belongings onboard. In addition to the mandatory boating equipments, also the seat cushions, the stern canopy and a canopy storage compartment is included. The AMT 190 BR also comes with the Securmark anti-theft marking. The boat has also been constructed with the unique "Safely to shore" -structure. This construction method significantly improves the boat's safety. Even though the hull would be filled up with water, the boat's deck keeps the boat afloat.

All the AMT boats are designed and manufactured in Finland.

AMT 190 BRf is a spacious and versatile Bow Rider, which gives a fast but stable ride. Moving in the boat is easy and safe, thanks to its well functioning layout. The boat is extremely fun to drive, and it suits equally well for city cruising and fishing as water sports and use at the summer house.

In addition to the mandatory boating equipments we have included also the seat cushions, the stern canopy, a canopy storage compartment and the storage compartment's Abloy lock system. AMT 190 BRf also comes with the Securmark anti-theft marking. The materials and components used are of high quality, following the AMT vision. The 190 BRf has also been constructed with the unique "Safely to shore" -structure. This construction method significantly improves the boat's safety if an emergency at sea occurs. Even though the hull would be filled up with water due to a collision, the boat's deck keeps the boat afloat so that you can steer the boat to the nearest shore, or call for help.

AMT 190 BRf combines a sturdy hand-welded marine aluminium hull with a comfortable and easy-to-maintain fiberglass interior. The durable aluminium hull is manufactured in Finland by Juha Snell Oy.

AMT 210 BR is a stylish new age Bow Rider. The sporty and sleek looking boat is not only a beauty, but has also excellent driving properties even for a more demanding user.

The brand new 6,3 meters long Bow Rider sets between the 190 BR and 230 BR giving more options to find the best boat to suit your needs. The boats design follows AMT's new age shape with more efficient use of space and excellent driving properties. The boat is modern and stylish with well thought details. The interior is spacious with lots of storage compartments and seats for seven.

210 BR has the AMT's famous "always to shore" -structure. This means that the boat floats even if it would start to fill with water. This feature makes the AMT boats extra safe and will take you always back to the nearest shore.

As all the AMT boats, so does the 210 BR have a comprehensive level of standard equipment. This includes for example Dryfeel-cushion set, stern canopy, hydraulic steering, anchor and fenders. All the AMT boats have Securmark anti-theft marking. In addition for the comprehensive standard equipment the boat is possible to equip with a wide range of accessories. For example sunbed, drawer fridge, trimtabs, pressurized water system and a media player with loudspeakers.

All the AMT boats are designed and manufactured in Finland.

NEW!

240 DC

AMT 240 DC is designed and built in Finland. The boat has a five-year hull warranty. The comprehensive standard equipment of the AMT 240 DC includes, a drawer fridge, 12" chart plotter, sea water toilet, trimtabs, nmea network and electronic remote control.

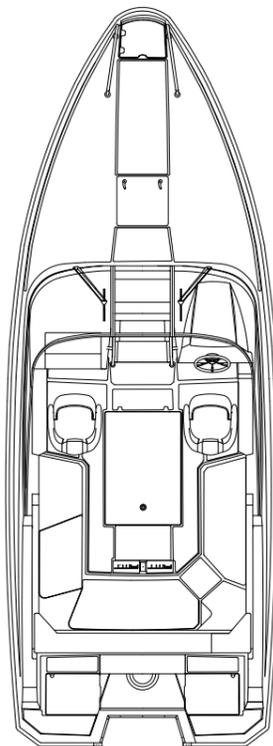

The large open space with a U-shaped sofa offers ample space for lounging. The U-sofa can be made into a generous sunbed or an extra bed. There are plenty of storage space under it, which are equipped with fixed Abloy locks, like all the other storage spaces on the boat. The entire open space may be covered with a canopy, below which there is standing height. The canopy has its own spacious case, where the canopy can be stored in good order and is completely out of the way when it is not needed. The standard equipment also includes, among other things, a handy table, a freshwater system and a Garmin 12" plotter.

Accommodation for two adults can be found under the bow deck. The stylish bow cabin has full seating height and access is convenient through the sliding door in the middle of the boat. In addition, there is a sea water toilet and a handy hatch as a standard.

From the boat's extensive list of accessories, everyone can customize the boat to suit their own use. For example, you can choose a Webasto heater that increases comfort or a pantry module for the boat, which offers the possibility of a larger refrigerator and a Wallas stove.

The driving characteristics are top of the class. You can use the superb performance and sportiness of the boat without worry, the boat behaves consistently in all situations. In addition, to guarantee driving pleasure, seats have pedestals with height adjustment and suspension. The boat's safety and economy are features that you can appreciate at all speeds.

All the AMT boats are designed and manufactured in Finland.

AMT 215 PH
PRO FISHING

The AMT pilot house model for the demanding boaters who want to be out on the sea from the second the ice breaks in spring until the first frost falls late in the autumn. Plenty of storage, a spacious and flat aft deck and a sheltered cabin that sleeps three are some of the selling points of the AMT 215 PH. The boat is easy to customise according to your own needs.

A versatile and high-performance seafarer for the demanding boater. This model features a hull with a high bow, a spacious and flat aft deck, ample storage and a sheltered cabin for sleeping. It is suitable for a number of uses from commuting to freight transport, fishing, outings and professional use. The boat can be customized for different purposes, which has been taken into consideration at the design phase: each customer can select the equipment they need. AMT 215 PH is a combination of top-class finish and powerful features, designed to handle even the roughest conditions without the driver needing to consider turning back to the shore if the weather changes or wind picks up.

All the AMT boats are designed and manufactured in Finland.

ABOUT AMT – A PIONEER FOR 36 YEARS

The year was 1986, when the boat and motor division of Finland's largest central wholesaler asked Aimo Mustonen to establish a boat factory for designing and manufacturing a proprietary boat range for the company. The central wholesaler had had its proprietary brand for years, and the range available at the time mainly consisted of products from different boat manufacturers, marketed under the wholesaler's own brand. The new range was to be designed and manufactured to be competitively priced even though the distribution chain was one link longer than that of competitors.

The development of AMT-Veneet Oy's production facility was launched immediately, including a global survey on small boat manufacturing. The actual production began on Nov. 4, 1987. The staff at the production facility had been trained in AMT's new and effective serial production methods, and within a few months production volumes surpassed those of competitors that used traditional methods.

In addition to manufacturing, AMT's operations included structural design of boats, selection and procurement of materials and accessories as well as establishment of an extremely effective component manufacturer network. AMT also handled boat certification and distribution to retailers and importers.

Boats manufactured by AMT quickly became a staple of quality in their size classes which others aspired to achieve and were benchmarked against. AMT continued as the contract manufacturer of the central wholesaler until 2005 when it decided to discontinue the collaboration. Up until then more than 30 boat models were designed and more than 25 000 boats manufactured at the company's two production facilities.

In the latter half of 2005 AMT began developing its own proprietary boat range. Switching from contract manufacturing to proprietary products offered the company better opportunities to apply and gain benefits from its expertise. Many features enhancing safety and comfort, which had not been feasible earlier due to cost reasons, could now be implemented in the company's own models. The first five AMT-models were introduced for the first time at the 2006 Helsinki International Boat Show. During the past years the range has grown to a versatile fleet of 14 boats in size classes 4,5 to 7,3 meters.

Trailblazer and test winner

AMT designs, develops and manufactures its own products. The company has also developed a special 3D design software that directly controls the machining units and enables simultaneous manufacturing of prototypes and molds of all parts of the boat. This method offers excellent measurement accuracy, and it has taken the use of space and, most of all, safety in the design of the AMT range to a whole new level.

The end result is AMT boats that meet the needs of the most demanding boaters. Ever since they were first introduced, AMT boats have been extremely successful in product tests and comparisons conducted by both Finnish and International boating magazines.

An All-Finnish boat range

The AMT boats are as Finnish as they come, both designed and manufactured by Finnish professionals at two modern Finnish factories. AMT was the first boat brand to receive the "key flag" award by the Association for Finnish Work in recognition of the domestic origin of the products. At the two factories in Kontiolahti in the Northern Karelia region, up to 1 600 boats are built every year.

AMT is also a significant exporter selling boats abroad in e.g. Sweden, Norway, Denmark, Estonia and the UK.

DRIVEABILITY

The performance provided by four-stroke outboard engines and the maneuverability of the boats have been ranked excellent in several tests by boat magazines.

COMFORT

The design of the boats' details incorporates solutions that increase the comfort level of the driver and passengers. The equipment standard of the boats is second to none in each size class.

SAFETY

All design builds on unyielding safety. The boats incorporate a unique "safely to shore" construction that makes them unsinkable as well as other structural safety features.
